

# AIR CONTAINER

Modular, containerised air filtration. An African solution to a global problem.

# AIRCURE

Modular, containerised air filtration. An African solution to a global problem.

AIRCURE takes a standard used container, and re-purposes it with a new life as an air filtration system to clean the environment, and get rid of unwanted old containers in a single product.

Supply your own containers for an even lower-cost solution.

## Product Information

- HEPA Filters are optional - we can supply any level of filtration to suit your budget
- Redesigned fan for increased capacity
- Small footprint
- Modular - building block construction
- Easy to install and maintain
- Can scale size to air requirements
- Transported easily on the back of a regular container truck
- Red/green pressure indicating system
- **Locally manufactured in South Africa**
- Perfect product for exportation (product is the container)
- Spares and parts easily available

## Environomics Features

- ✓ Reclaimed Containers: Reduce costs and impact on environment. This not only 'ticks the box' for cleaning the environment, it also conforms to the 'Reduce, Reuse, Recycle' philosophy. AIRCURE gives it a **higher purpose** and a new life - instead of simply removing a problem
- ✓ Green Ducting: All pipework/ducting/foot mountings made from used 40-gallon steel drums
- ✓ Green mountings: Anti-Vibration mountings for fans, formed from discarded car tyres
- ✓ Solar: Optional solar panel for all internal lights and controls
- ✓ Redesigned fans: Redesigned fan blades and construction to optimise on energy efficiency. 20–25% reduction in actual energy use.
- ✓ Green filters: Filters created from recycled materials
- ✓ Re-used shipping pallets: Loose spare parts shipped on re-used pallets

*Green ducting: ducting made from reclaimed 40-gallon steel drums*

*Foot mounting made with steel drums and concrete*

*Green Anti-vibration Mountings for fans using discarded car tyres*
