DESIGNING CLEAN AIR **FOR LIFE**

AIR SHOWER

De-dusting people and products.

The AIR SHOWER allows your workers to remove dust from themselves when exiting dusty areas. This minimises cross contamination between people and products, and reduces risks associated with dust exposure.

Product Information

- Using only high-efficiency filtered air to blow you clean
- Reduces the risks associated with dust exposure to both the respiratory system and skin contact
- The principle can be extended to larger volumes of people or products
- Reduces cross contamination between people and products
- Single or multiple user cubicles
- Effective in cleaning raw materials prior to entry into manufacturing
- Hand-held air brush blower for releasing stubborn deposits

Typical Applications

- Laboratories
- Pharmaceutical Manufacturing
- Heavy industry and mines
- Facilities with dangerous substances and heavy metals
- Cement factories
- Clean-room electronics
- Food production

Environomics Features

- ✓ Green filters: Filters created from recycled materials
- ✓ Re-used shipping pallets: Loose spare parts shipped on re-used pallets
- ✓ Reduce laundry cost: De-dusting the need for heavy cleaning

Hand-held air brush blower and wall-mounted air jets for de-dusting

Top entry intake air louvres provide a shower effect
